DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to methods of detecting nucleic acids of interest comprising subjecting a sample comprising said nucleic acid(s) to nuclease protection with one or more protection fragments, classified in class 435, subclass 6, for example.
 - II. Claims 11-15, drawn to a combination and methods of using a combination comprising a surface comprising multiple spatially discrete regions and at least 8 different oligonucleotide anchors, classified in class 435, subclass 4, for example.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the inventions are directed to methods having different method steps, starting materials, and goals. Specifically, the combination of Group II is not used in the methods of Group I; Group I comprises subjecting a sample to nuclease protection, whereas nuclease protection is not mentioned in Group II. Accordingly, Groups I and II are unrelated as each Group is not capable of use together and have different modes of operation, different functions, or different effects.

3. Because these inventions are distinct for the reasons given above and have acquired a different status in the art as demonstrated by their different classification and recognized divergent subject matter and because inventions I-II require different searches that are not co-

extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
